**Master’s Graduate Research Assistant**

**Temporary part-time** (up to a max of 10 hours a week for 37 weeks ending March 31, 2024)

**Hourly rate:** $32.46 plus 4% vacation pay

**Start date:** July 17, 2023

**End date:** March 31, 2024

**Job Description:**
The Well-Tech Research & Design Laboratory is seeking a Master’s student in the Greater Toronto Area (GTA) for an hourly position to support the Needs Evaluation to Learn Valuable Information about Aging in Canada (NELVIA-Can) project. NELVIA-Can is funded by AGE-WELL and Canadian Frailty Network (CFN) Catalyst Funding Program in Healthy Aging and is focused on understanding the challenges Black older adults in the GTA face when completing daily and community activities, their solutions to overcome the identified challenges, and technology solutions used to support them. This position will include training and professional development opportunities as well as potential travel opportunities.

**Primary Duties and Responsibilities:**
*This job description is not exhaustive. Additional duties may be added as projects progress.*

- Assist with project management
- Attend regular individual, project, and lab meetings
- Develop study and training materials
- Organize and facilitate interviews with Black older adults in-person (travel will be covered) and/or remotely utilizing an anti-racist research framework
- Assist with data analysis of qualitative and quantitative research data
- Supervise undergraduate research assistants
- Lead a collaborative process to submit to conferences, peer-reviewed manuscripts for publication, and grants

**Position Qualifications:**
A Master’s student who is an independent worker, highly motivated, and works effectively amongst a multidisciplinary team. The Master’s student has:

- Experience in health studies, psychology, aging, or a related field
- Excellent written and oral communication skills
- Excellent organizational and interpersonal skills
- Excellent interview and facilitation skills

Additionally, the Master’s student has experience with:

- Coordinating and managing projects
- Working directly with Black older adults
- Conducting qualitative interviews
- Using qualitative data analysis software (e.g., NVivo)
